### 5 Preferred option for decision by the EPA

Assess - Public environmental review

### 6 What are the reasons for your preferred option for decision of the EPA?

Reasons:

1. Assess cumulative impact on vegetation clearing in the Pilbara.
2. Assess the potential loss of vegetation associations which are confined to iron ore deposits of this nature in the East Pilbara region.
3. Dust control associated with vehicle and equipment movements and its impact on neighbouring vegetation.
4. Social impacts associated with loss of ecosystem services, natural and cultural heritage.
5. Landscape amenity during and post-mining.
6. Potential for backfilling Stage 1 pit with Stage 2 waste instead of creating more waste rock dumps.

By checking this box you are consenting to your comments being used to inform the EPA's decision on whether to assess this proposal and, if so, the level of assessment, and understand that your comments and / or any part of your submission may be made public. If you wish your comments and / or any part of your submission (i.e. name and contact details) to be treated as confidential, please make a specific request in your submission. It is important to note that a request for confidentiality does not make your submission automatically exempt from disclosure. While the department will use its best endeavours to comply with your request, your submission (or part thereof) may still be disclosed if required under the Freedom of Information Act 1992, for procedural fairness purposes or under any other applicable law. :
