52 McGLEW ROAD
GLEN FORREST**

FREE

CATALOGUE & PLANT INFO

WILDFLOWER SOCIETY PLANT SALE 2024

Gates open at 9am. Although early customers have the best selection of plants, we always have a good range of popular species available all morning. Bring a box or a plastic basket with you to take your plants home.

Species are listed on the catalogue in alphabetical order within each category. Natural habitat is given as a guide to selection and planting. Species from SW forests prefer shade and some extra summer water. Many SW swamp species, particularly Boronias, make excellent pot plants. Heathland species are generally hardier and will grow in full sun. Most species, however, are quite adaptable and have been successfully grown by our members in Hills gardens. Many of our plants are not yet available in nurseries.

Whilst we try to make our catalogue as accurate as possible, some listed plants may not be available due to circumstances beyond our control. However we always have small numbers of additional, unlisted species.

Further information on plants will be available inside the hall. We also have seeds of native plants for sale and booklets on aspects of native gardening.

The plants are sorted on the tables alphabetically within each category. The plan of tables is at the back of the catalogue. **We have marked Local species with a yellow disc on the main label.**

ALL PLANTS CONTAIN A COLOUR CODED BAMBOO SKEWER TO INDICATE THE PRICE. SOME HAVE A BAMBOO SKEWER WITH A PRICE ON IT. The code is given to the right. Coloured labels, plant stakes or ties do not indicate price. Select your plants and pay the Cashiers at the gate.

The plants are grown by our members for your gardens. We hope you enjoy our Sale.

A NOTE ABOUT CHANGES TO PLANT NAMES

Our knowledge of the flora of Western Australia is in a constant state of change at the present time. New species are continually being found and the relationships of known species are steadily being revised.

We endeavour each year to keep the names to the most current botanically correct name for the Plant Sale and to this effect we usually make a note in the Common Name or Special Features columns of the catalogue as to the previous name that you might have known the plant so as to help make you aware of the change.

BITS & PIECES TABLE

This year we again have a “Bits & Pieces” table which are plants that are in limited quantities and therefore not on the catalogue and which would get lost in amongst everything else. ***Have a browse, you could find something really special.***

PRICE CODING (COLOUR OF SKEWER)

Yellow	\$2.50	Pale Green	\$4.50
Orange	\$3.00	Pink	\$5.00
Red	\$3.50	White	\$6.00
Blue	\$4.00	Purple	\$7.00

Other Prices as Marked

Please Note: GST will be added to these prices at point of sale at the Cashier Tent

**** SOME GREAT IDEAS FOR YOUR GARDEN ****

<u>West Australian Wattles</u>	<u>Cockatoo Food</u>	<u>West Australian Grasses</u>
<p>Can be used in a wide variety of garden situations from rockeries, shrubberies to providing shade.</p> <p>Most are very drought tolerant while some like damp situations.</p> <p>Most prefer full sun but some from forest areas will grow in partial shade.</p> <p>There is a variety of sizes and shapes from short and clumpy to tall, slender and elegant.</p> <p>Wattles are great for establishing new gardens in poor soil.</p> <p>Support biodiversity in your garden by supplying vast quantities of food and habitat.</p> <p>Are legumes. This means they supply their own nitrogen and enrich the soil.</p> <p>Grow easily from seed.</p> <p>Give vibrant winter/spring colour.</p> <p>Exhibit a huge range of foliage colours and forms.</p>	<p>All three species of Black Cockatoo could be regular visitors to your garden if you grow a supply of their favourite food.</p> <p>Marri (<i>Corymbia calophylla</i>)</p> <p>Jarrah (<i>Eucalyptus marginata</i>)</p> <p>These are also a vitally important habitat tree for a vast number of species.</p> <p>All Hakeas – beautiful flowering plants similar to Grevilleas but generally with large woody fruits.</p> <p>e.g. <i>Hakea periolaris</i>; <i>Hakea undulata</i>; <i>Hakea orthorrhynca</i>; <i>Hakea trifurcata</i>; <i>Hakea lissocarpha</i></p> <p>All Banksias.</p> <p>e.g. <i>Banksia grandis</i>; <i>Banksia undata</i>; <i>Banksia sessilis</i>.</p> <p>WA Grevilleas.</p> <p>e.g. <i>Grevillea bipinnatifida</i>; <i>Grevillea endlicheriana</i>.</p> <p>(Note: Hybrids are often sterile and do not produce seed.)</p>	<p>Looking for something different? Why not try some grasses?</p> <p>These are not weedy:</p> <p>Most are very drought tolerant while some like damp situations (great around ponds and bog gardens).</p> <p>Some grow naturally in local forests and thrive in shaded areas.</p> <p>There is a variety of sizes and shapes from short and clumpy to tall, slender and elegant.</p> <p>There is a choice of cool or warm season growers.</p>

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
Clump Plants (Monocots)							
Anigozanthos	flavidus	Tall Kangaroo Paw	Spring	Green/Yellow	1.8	Easy to grow	SW forests and heaths
Anigozanthos	manglesii	Mangles Kangaroo Paw	Spring	Red/Green	0.8	State Emblem. Do not water in summer	LOCAL, sand or gravel
Conostylis	candicans (grey form)	Grey Cottonheads	Spring	Yellow	0.2	Lovely yellow flowers in round heads	Heathland and coast
Cymbopogon	ambiguus	Scentgrass	Summer	Pale green	0.5-0.8	Clumping plant, dry sites ,responds to summer water	Northern WA
Cymbopogon	obtectus	Native Lemon Grass	Summer	Pale green	-0.7	Scented clumping grass, attractive silky heads	LOCAL, open forest, outcrops
Dianella	brevicaulis	Blueberry Lily	Spring	Blue	0.5	Strap leaved clumping plant, blue flowers and purple berries.	Suits most soils in full sun to part shade. Very hardy. SW forests
Dianella	revoluta	Blueberry Lily	Spring	Blue	0.8	Large greyish leaves, blue flowers	LOCAL, tough, drought tolerant.
Eragrostis	elongata	Clustered Lovegrass	Spr/Sum	Mauve	0.3	Summer active perennial clump grass, attractive mauve flower heads	LOCAL, damp areas
Macropidia	fuliginosa	Black Kangaroo Paw	Aug-Dec	Greenish yellow/black	0.2-1.8	Rhizomatous, perennial, herb with strap like leaves.	From Geraldton to Perth. Sand, lateritic gravel, laterite.
Microlaena	stipoides	Weeping Grass	late Spring	Green/Purple	0.3-0.75	Winter active, perennial tufts, understorey, spreads	LOCAL grass, forest areas
Orthrosanthus	laxus	Morning Iris	Sept-Oct	Blue	0.5	Hardy plant forming erect clumps of grass like leaves with showy blue flowers	LOCAL, Variety of soils.
Orthrosanthus	multiflorus	Morning Iris	Sept-Nov	Blue	0.6	Large clumps, free flowering spikes. Spreading clumps	SW plant, most soils
Patersonia	occidentalis	Purple Flags	Summer	Purple	0.5	Hardy and easy to grow. Good for rockeries	LOCAL, most habitats
Sowerbaea	laxiflora	Purple Tassels	Spring	Pink/Purple	0.3	Dormant in summer	LOCAL and inland
Sporobolus	virginicus	Marine Couch	Jan/Dec	Green/purple	0.1-0.5	Summer active perennial, salt tolerant, spreads by runners	LOCAL near water
Themeda	triandra	Kangaroo Grass	Oct-Nov	Tinged green & rose pink	1m	Perennial with loose tussocks often in extensive patches several square metres. Head of nodding spikelets.	LOCAL
Thysanotus	multiflorus	Fringe Lily	Aug-Nov	Purple	0.4	Showy flowers in heads	LOCAL, all soils

Ferns & Aquatic Plants

Eleocharis	acuta	Common Spikerush	Sept-Dec	Brown	0.4	Perennial, spreading sedge	Prefers full sun. For bog gardens and in water up to 30cm deep.
Machaerina	juncea	Bare Twigrush (syn Baumea juncea)	Oct-Dec or Jan-Mar	Red/Brown	0.2-1.2	Grass-like rush	Prefers full sun. For bog gardens and around ponds. SW WA

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
-------	------	-------------	-----------	--------	------	------------------	-----------------

Ferns & Aquatic Plants (Cont'd)

Marsilea	drummondii	Common Nardoo	Winter		0.2	Perennial aquatic, semi-aquatic. In drier clays, re-emerges in winter. Spreads by rhizomes.	LOCAL in water or damp soil. Ideal for bog gardens
----------	------------	---------------	--------	--	-----	---	--

Everlastings

Podolepis	aristata		July-Dec	Yellow	up to 0.7	Fast growing perennial herb with sparse dark green foliage on wiry stems	Variety of soils in full sun.
Podotheca	gnaphalioides	Golden Long Heads	Aug-Nov	Yellow/Orange-yellow	0.02-0.6	Erect or decumbent annual herb.	Variety of soils, tends to favour sandy soils.
Rhodanthe	chlorocephala	Everlastings	Spr-Summ	Pink	0.5	Annual. Will self-propagate.	Dry inland areas
Rhodanthe	humboldtiana	Everlastings	July – Nov	Yellow	0.1-0.5	Annual. Will self-propagate	Dry inland areas
Rhodanthe	spicata		Aug-Nov	Yellow	0.04-0.3	Erect annual with grey-green finely haired leaves. Flower stems emerge and rise carrying dense spikes of pale yellow buds that open to bright yellow flowers.	Grows in a wide range of soils in full sun or light shade.
Schoenia	cassiniana		Spring	Pink	0.4	Annual, multiflowered heads, responds to dead-heading	Wheatbelt and pastoral areas
Schoenia	filifolia		July-Nov	Yellow	0.5	Annual. Will self-propagate	Wheatbelt and goldfields

Climbers

Billardiera	lehmanniana	Kurup	Aug-Dec	White	0.6-1.5	Colourful spreading shrub 0.60 or climber to 1.5m if given support. Masses of white flowers	Widespread, Esperance plains. Most soils in full sun/part shade.
Kennedia	beckxiana	Cape Arid Kennedia	Spring	Orange	3-5	Vigorous climber, spectacular flowers	Ideal for scrambling over fences. Cape Arid, heathlands
Kennedia	lateritia	Augusta Kennedia (syn. Kennedia macrophylla)	Sept-Oct	Red	2-4m wide	Rare colourful climber with large lush leaves.	Suits most soils including coastal and limestone conditions in full sun/part shade. Augusta area

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
Banksia	bipinnatifida	Ground Dryandra	Oct-Nov	Cream/yellow/brown	0.1-0.3	Prostrate Banksia, flower half buried in the ground, leaves much divided, fern like.	LOCAL, sand, gravel, laterite, woodlands
Banksia	dallanneyi	Couch Honeypot (formerly Dryandra lindleyana)	June-Sept	Greeny-brown	0.3	Trailing to semi-erect stems	LOCAL. Heathlands and forests
Calandrinia	reticulata		Aug-Oct	Pink-Purple		Succulent, annual.	Arid areas in red sands and red shingle clays.
Chamelaucium	sp Wongan Hills		Oct-Nov	Dark pink/magenta	0.3	Soft spreading ground cover. Will cover banks.	Well drained soils in full sun/semi shade. Wheatbelt.
Dampiera	decurrens		Sept-Jan	Purple-blue	0.1-1	Stiff robust perennial, masses of purple-blue flowers.	Well drained soils in full sun/part shade. Ideal for borders, rockeries and pots. Esperance Plains
Dampiera	linearis	Common Dampiera	May-Nov	Blue	0.3	Attractive suckering ground cover slowly spreading to 1m wide.	LOCAL. Suits most soils. Full sun to part shade.
Dampiera	trigona	Angle-stemmed Dampiera	Spring	Blue	0.3	Spreading, delicate and pretty, ideal for baskets	SW WA
Disphyma	crassifolium	Round-leaved pigface	Aug-Feb	Deep pink, purple, violet	0.3 x 1	Prostrate succulent	Inland or coastal, salt and lime tolerant. Suits all soils. Full sun.
Enchylaena	tomentosa	Barrier Saltbush	May-Sept	Orange berries	0.6	Hardy ground cover, grey foliage, orange berries	Inland extensive
Eremophila	glabra (prostrate)		Aut-Sum	Various colours		Is one of the most variable and complex species in the genus. It is very variable in its leaves & habit. Colours range from green, yellow, orange, apricot or an assortment of reds.	Variety of situations
Gastrolobium	villosum	Crinkle Leaf Poison	Spring	Red	0.3	Prefers open site, good for road verges	LOCAL
Goodenia	varia		Oct-Jan	Yellow	0.1	Lush groundcover, dainty flowers, hardy, suits hanging baskets	Coastal Mallee
Hemiandra	pungens	Snake Bush	July-Nov	Mauve	0.05-1	Prostrate to ascending shrub 0.05-1m with prickly leaves.	Prefers well drained soils in part shade. Suitable for cottage gardens and raised beds.
Hemiandra	pungens	Shrub form	Spr-Sum	Purple	1	Foliage is fine and spiky, having a purplish hue on the new stems.	Very hardy and adaptable liking well drained soils in full sun.
Kennedia	carinata		Spring	Red	0.1	Excellent for baskets. Shade and summer water	Karri forest
Kennedia	glabrata	Northcliffe Kennedia	Spring	Red	0.2	Beautiful glossy foliage. Rare in the wild.	SW granite
Kennedia	prostrata	Running Postman	Spring	Red	0.1	Hardy local groundcover, red pea flowers	LOCAL. Suits most soils in full sun/part shade.
Leptosema	aphyllum	Ribbon Pea (prostrate form)	May-Oct	Red/Yellow	0.2 X 1.5 wide	Unusual spreading prostrate groundcover. Flat ribbon-like foliage with red pea flowers.	Well drained soils in full sun/part shade. Suitable for rockeries and verges. Northern sandplains.
Lithotoma	petraea	Rock Isotome (was Isotoma petraea)	Feb-Nov	Blue/Blue purple	0.2	Erect spreading herb	Widespread in rocky areas/crevices.
Lobelia	anceps (syn. alata)	Angled Lobelia	Oct/May	Blue	0.3	Small twining herb, wet areas.	LOCAL damp areas

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
Ground Covers and Rockery Plants (cont'd)							
Pelargonium	australe	Wild Geranium	Feb-May or Sep-Dec	Pink/purple/white	0.1-0.5	Decumbent or ascending perennial herb.	Hardy in a range of soils and prefers full sun or light shade. Often found in pockets of deeper soil on the upper slopes of large granite outcrops,
Rhagodia	spinescens	Nodding Saltbush		Red berries	0.1	Widely branched, open spiny shrub. Formerly Rhagodia nutans	N, interior and coastal
Scaevola	argentea X (Hybrid)	Wild Wonder (Garden Seedling)	Sept-April	Mauve/blue	0.05	Colourful silver foliated prostrate groundcover. Excellent for pot culture and small gardens.	Well drained soils in full sun to part shade.
Stylidium	affine	Queen Trigger Plant	Sept-Nov	Pink	0.4	Hardy, lovely large flowers. Forms small clumps	LOCAL, Wandoo
Stylidium	caespitosum	Fly-away Trigger Plant	Nov-Jan	White/Pink	0.4	Fine leaved rosetted perennial herb.	Sandy loamy soils. Lower SW WA
Stylidium	corymbosum	Whitecaps	Oct – Nov	White	0.3	Perennial herb.	Sand or clay soils, granite. Swampy flats, rocky sites. Albany to Ravensthorpe

Shrubs A- Z

Acacia	alata	Winged Wattle	June-Oct	Yellow	1.0	Fast growing local species, shade	LOCAL, forest gullies
Acacia	aphylla	Rock Wattle	Winter	Yellow	0.9-2.0	Leafless prickly shrub. Rare in wild	LOCAL, heavy soils
Acacia	collettioides	Wait a While	Aug-Oct	Yellow	to 3m	Rigid spreading prickly shrub.	Prefers well drained sandy soils in full sun/part shade. Good bird habitat. Wheatbelt
Acacia	congesta		Spring	Yellow	0.5-2.5	Spreading shrub, rocky/heavy soils open dry sites	East of Perth
Acacia	consobrina		May to Sept	Yellow	0.5-1.5 to 3.5m wide	Rounded spreading shrub.	Clay and sandy clay loams. SW WA
Acacia	denticulosa	Sandpaper Wattle	Spring	Yellow	3.0	Erect sparsely branched shrub with large spectacular rod flowers, fascinating foliage	Full sun to part shade. Well drained sand or gravel soils. Drought tolerant. Dry inland areas
Acacia	dentifera	Toothed Wattle	Spring	Yellow	1.2	Fast growing, attractive narrow leaves Can prune	LOCAL, granite/laterite
Acacia	ephedroides		Aug-Oct	Yellow	1-4	Open weeping shrub, nice curly bark, rod flowers	LOCAL granite outcrops
Acacia	lanuginophylla	Woolly Wattle	June-Oct	Yellow	0.9	Compact and dense low shrub with soft grey hairy foliage. Declared rare.	For well drained soils in full sun to part shade. Coolgardie
Acacia	lateriticola		Winter	Yellow	1.0	Fast growing local species prefers gravel soils	LOCAL and SW, gravel soils
Acacia	leptalea	Chinocup Wattle	July	Yellow	0.5-2.0	Dense rounded shrub. Masses of yellow wattle flowers. Declared rare.	Prefers well drained sandy or loamy soils in full sun/part shade. Western Mallee.

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
Shrubs A- Z (cont'd)							
Acacia	leptospermoides		Jun-Sept	Yellow	0.1 - 2.0	Fleshy-leaved shrub	Various soils. From Shark Bay to Albany.
Acacia	pulchella	Prickly Moses	Jun-Oct	Yellow	1.0	Repels dieback	LOCAL forests
Acacia	sessilispica		Aug-Sept	Yellow	0.8-2	Rounded shrub, showy flowers	SW and interior
Acacia	splendens		May	Yellow	to 8m	Shrub or tree, bark dark grey. Responds well to light pruning.	White sand over clay, pale brown loam, cracked brown soil, gravel, laterite, ironstone.
Acacia	stenoptera	Narrow-winged Wattle	Mar/Dec	cream/yellow	0.2-0.7	Small sprawling, prickly shrub, extended flower period	LOCAL and SW
Acacia	teretifolia		May-July	Yellow	0.2-0.5	Erect open pungent shrub.	LOCAL Laterite, sand over laterite, sandy clay over granite.
Acacia	urophylla	Net Leaved Wattle	Autumn	Pale Yellow	2.0	Needs shade and some summer water	Forests, local and SW
Apectospermum	spinescens	Spiny Tea Tree	Sept-Dec	Cream-white	1.0	Spiny, rigid, often twisted shrub	Prefers well drained soils in full sun/part shade. Hardy. Perth Metro.
Allocasuarina	campestris	Shrubby Sheoak	Aug-Nov	Red/Brown	1-3	Dioecious or monoecious shrub	Sandy or gravelly soils. Widely found through the Mid West, Wheatbelt, and the south west of the Goldfields-Esperance regions of WA.
Allocasuarina	globosa	Marble-Podded Sheoak	Sept-Nov		1.5	Medium sized dioecious shrub with pheral marble-like fruiting cones	Suits well drained laterite, clay or loam soils in full sun. Waterwise. Hardy.
Astartea	muricata	Inland Astartea	Oct-Nov	Pink/White	to 1.0	Profuse flowers	Wheatbelt. Sandy clay soils on seasonally wet flats and river flats
Astartea	scoparia (formerly Astartea fascicularis)		Wint-Sum	White/pink	1-2	Creeklines or extra summer water, Mass plant	LOCAL, creeklines, swamps
Atriplex	nummularia	Old Man Saltbush			1.0-3.0	Erect, ornamental shrub with attractive silver-grey foliage.	Useful for hedging or screening. Prune to keep compact. Salt and limestone tolerant. Very hardy. Goldfields.
Babingtonia	grandiflora	Large flowered Baabingtonia (Was Baeckea grandiflora)	Aug-Dec	White	0.8	Spreading open shrub	Prefers well drained soils in full sun. Prune to shape after flowering. Geraldton sandplains.
Banksia	attenuata	Slender Banksia (Dwarf fom)	Oct-Feb	Yellow	1.5	Multi branched shrub with conspicuous yellow cone flowers.	Prefers well drained soils in full sun. Ideal small feature plant and cut flowers. Hardy
Banksia	sessilis	Parrot Bush (formerly Dryandra sessilis)	Apr-Nov	Yellow	0.5-5	Prickly Shrub, nectar rich. Habitat plant	LOCAL all soils, hardy
Beaufortia	aestiva	Kalbarri beaufortia	Dec-Mar	Red/Yellow	1.5	Dense rounded shrub.	Prefers well drained soils in full sun. Suitable for open gardens and hedging. Drought tolerant. Geraldton sandplains.

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
Beaufortia	eriocephala	Woolly Bottlebrush	Sept-Dec			Erect compact shrub. Terminal bright red bottlebrush flowers.	Suits well drained sandy gravel soils in full sun/part shade. Dandaragan Plateau.
Beaufortia	squarrosa	Sand Bottlebrush	Jan-May or Aug-Dec	Red	1-2	Brilliant red flowers	White, grey or yellow sand, sometimes over limestone, laterite.
Beaufortia	squarrosa (orange form)	Sand Bottlebrush	Spring	Orange	0.5-2	Open shrub.	Well drained soil, sun/ part shade. Perth Metro
Boronia	megastigma lutea	Yellow Scented Boronia	Jul-Sept	Yellow	0.7	Fragrant flowers, damp location or pot plant	SW swamps and creeks
Bossiaea	pulchella	Beautiful Bossiaea	Aug-Sep	Yellow/Brown	1.0	Heart shaped leaves. Laterite gravel, understorey/shade	LOCAL, Jarrah forests
Bossiaea	walkeri		Jul – Nov	red/red orange	0.5-2.5	Erect dense leafless shrub.	Goldfields and Murchison. Red or yellow sand, clay, limestone. Near salt lakes, limestone ridges and cliffs, granite rocks.
Callistemon	phoeniceus	Fiery Bottlebrush	Spring	Red	2-3	Grey foliage, dark flowers	LOCAL along watercourses
Calothamnus	gilesii		Nov-Dec	Red	2.5	Tall windbreak plant, granites, sands, dry exposed sites	Wheatbelt and desert
Calothamnus	lehmannii	Dwarf Claw Flower	Aug-Oct	Red	0.1-0.5	Low prostrate shrub with red flowers clustered along the stem	Prefers well drained sand or sandy lateritic soils in full sun/part shade.
Calothamnus	quadrifidus	One Sided Bottlebrush	Sep-Nov	Red	1.0	Wonderful for birds. Most soils	LOCAL heathlands
Calothamnus	quadrifidus subsp homalophyllus	Murchison Claw Flower	Aug-Nov	Red	2-5	Attractive upright shrub with pine-like foliage	Suits most well drained soils in full sun. Hardy. Bird attracting. Prune regularly to shape. Geraldton Sandplains
Calothamnus	rupestris	Mouse Ears	July-Nov	Dark Pink	3.0	Bird attracting. Rounded, hardy prickly shrub. Most soils	LOCAL granite areas
Calytrix	acutifolia		Apr-Dec	White	.2-2.6	Slender open-branched shrub with masses of white star-like flowers	LOCAL suits sandy, loamy and gravelly soils in full sun/part shade. Tip prune after flowering.
Calytrix	glutinosa		Spring	Pink/Purple	0.2-1	Hardy shrub, most soils showy. Dry, open sites	LOCAL, granite outcrops
Calytrix	tetragona	Common Fringe-Myrtle (Upright form)	Oct-Nov	White	0.2-1.5	Narrow upright shrub.	Suits most well drained soils in dappled shade to full sun. Limestone tolerant. Southern WA.
Chamelaucium	axillare	Esperance Waxflower	Sep-Dec	White	1.2	Erect open shrub. Waxy white flowers aging to red.	Prefers well drained soils in full sun. Suits pot culture. SW WA coast.
Chorizema	aciculare	Needle-leaved Chorizema	July-Oct	Yellow-orange-red-pink	0.15-0.5	Erect or spreading shrub.	Sandy, loamy soils, laterite, granite. Outcrops, undulating plains, ridges, coastal dunes, sometimes swampy areas.
Chorizema	cordatum	Flame Pea	Wint/Spr	Red/Orange	0.6	Compact hardy shrub	LOCAL
Chorizema	dicksonii	Yellow-eyed Flame Pea	Spring	Red/ Orange	0.6	Well branched shrub. Clays/ laterites. Part to full sun	LOCAL Understorey or open position
Chorizema	ilicifolium	Holly Flame Pea	Aug-Nov	Red/Orange	1.0	Attractive foliage; brilliant flowering shrub. Hardy	LOCAL, forests

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
Commersonia	erythrogyna		Aug to Oct	Creamy white	To 1.5	Threatened small shrub. Understorey plant so does well under trees in the garden.	Best with occasional summer water. Laterite soils. From southern forests around Boyup Brook.
Darwinia	citriodora	Lemon Scented Darwinia	Spring	Yellow/Orange	0.8	Lemon scent. Hardy local shrub	LOCAL, granite rocks
Daviesia	epiphyllum		Apr-July	Red/Orange	1.5	Shrub with very unusual flattened staghorn-like silver leaves	Suits well drained sandy lateritic soils in full sun. Geraldton Sandplains
Diplolaena	microcephala	Lesser Diplolaena	July-Dec	Red/Yellow	0.5-2	Dense spreading shrub with attractive pendulous small red/yellow flowers	Attractive pendulous small red/yellow flowers Jul-Dec. Suits well drained soils in full sun/part shade. Prune to shape. Hardy. Esperance Plains.
Eremaea	beaufortoides	Orange Eremaea	Sept-Dec	Orange	1.0	Colourful spreading shrub	Well drained soils in full sun. For open gardens or pot culture. Light trim after flowering. Hardy. Sandy heathland
Eremaea	dendroidea		Sep-Nov	Orange	1-5	Medium sized shrub	Prefers well drained sandy or loamy soils in full sun/part shade. Prune after flowering to shape. Geraldton sandplains.
Eremaea	x phoenicea	Erect spreading shrub.	Oct-Nov	Red-pink/purple/violet	0.2-1.5	Erect spreading shrub.	Grey or yellow sand. Geraldton sandplain.
Eremophila	ciliata		Sept	Blue purple	1.5	Bushy spreading shrub.	Esperance. Threatened flora.
Eremophila	decipiens	Slender Fuchsia	All year	Orange/ red	0.1-1.8	Small hardy shrub, most soils incl. Salt. Sunny position	Extensive WA
Eremophila	denticulata	Toothed Eremophila	late spring	red	0.5-2.5	Easy to grow, full sun/ dappled shade, most soils	SW WA
Eremophila	denticulata ssp denticulata		Aug-Feb	Red/Pink	0.5-2.5	Colourful upright shrub	Suits most soils in full sun/part shade. Fast growing. Hardy. Bird attracting. Prune regularly to shape. Esperance sandplains.
Eremophila	drummondii	Drummond's Eremophila	July-Nov	Blue-Purple	0.3-2	Highly floriferous erect or bushy shrub. Declared rare.	Will suit most soils in full sun. Hardy. Prune to shape.
Eremophila	glabra		Aut-Sum	Various colours		Is one of the most variable and complex species in the genus. It is very variable in its leaves & habit. Colours range from green, yellow, orange or an assortment of reds.	Variety of situations
Eremophila	glabra ssp carnosa		May-Jan	red/orange/yellow	0.3-1m	Spreading shrub with grey-green foliage.	Coastal subspecies between Leeman and Port Gregory. Suits well drained soils, especially coastal sands and limestone. Best in full sun.
Eremophila	glabra ssp tomentosa		Apr-Nov	Orange/Red	0.5-2	Erect shrub.	Suits well drained soils, especially coastal sands and limestone. Best in full sun. Prune to shape.
Eremophila	inflata	Swollen Flowered Eremophila	Oct-Mar	Blue/purple/green	to 1.6	Attractive erect spreading shrub with colourful rows of bell-like pink/purple flowers.	Suits well drained soils in full sun/part shade. Drought tolerant. Tip prune. Southern Cross.
Eremophila	maculata	Native Fuchsia	All Year	Purple	1.5	Hardy outstanding colourful ornamental. Large purple flowers. Bird attracting.	Suits most soils in full sun to light shade. Goldfields.
Eremophila	maculata ssp maculata x viscida		July-Dec	Steely blue	2m x 4m wide	Fast growing shrub with prolific tubular steely blue flowers with purple spots	Suits well drained soils in full sun/part shade. Responds well to pruning.

PLANT	NAME	Common Name	Flowering	Colour	Ht m	Special features	Natural Habitat
Eremophila	microtheca	Heath-like Eremophila	Summer	Mauve	1.5	Erect shrub with grey-green foliage, masses of flowers, tolerates harsh conditions	Prefers sandy clay or loam in full sun/part shade. Tip prune to shape. Geraldton hills.
Eremophila	racemosa	Showy Eremophila	Aug-Dec	Purple/pink/red	1.5	Attractive upright shrub.	Well drained soils in full sun. Bird attracting. Prune after flowering. Southern Wheatbelt
Eremophila	scaberula	Rough Emu Bush	Aug-Oct	Purple, blue	0.15-0.75	Low compact or sprawling to upright heath like shrub.	Sth of Moora. Clay, sandy clay or loam soil.
Eremophila	splendens	Splendid Eremophila	Spring/ Sum	Red	1.5	Attractive, prostrate to upright open shrub. Light green, velvety foliage, tip prune regularly.	Suits most soils in full sun. Shark Bay area.
Eremophila	subangustifolia		June-Oct	Lilac	1-2.5	Erect, spreading much branched shrub emitting strong smell.	Near Encabba. Threatened Flora.
Eremophila	subfloccosa	Dense-felted Eremophila	June-Dec	Yellow/Green	1.0 x 2	Attractive low spreading shrub, soft silver hairy leaves.	NE Wheatbelt, Goldfields Full sun, semi-drought tolerant. Sandy/laterite/loam
Eremophila	subfloccosa ssp glandulosa		Sep to Nov	Yellow/Green	0.3-1.2	Erect or spreading, viscid shrub.	Loam, Gravelly clay loam. Eastern Goldfields, Esperance Plains.
Eremophila	weldii		Jun-Jan	Violet	0.1-1.5	Hardy and pretty small shrub	Goldfields
Eremophila	youngii ssp youngii		July-Dec	Red-pink	1-4	Highly floriferous grey leaved erect shrub	Suit most well drained soils in full sun. Drought tolerant. Between Kalgoorlie and Exmouth.
Gastrolobium	capitatum	Bacon & Eggs, syn. Nemcia capitata	Jul/Oct	Red/Orange	0.75	Low open shrub	LOCAL. Shade tolerant
Gastrolobium	ebracteolatum		Oct to Dec	Yellow/red/purple	2 to 4m	Slender erect shrub.	LOCAL , loam or sandy loam, riverline areas, swampy woodlands. SW WA and Geraldton sandplains.
Gastrolobium	spinosum	Prickly Poison	Winter/ Spr	Yellow/orange	2	Toxic to stock. Most soils, Open/understorey. Dry	LOCAL and widespread
Goodenia	decursiva		Oct-Nov	White	0.35-1.5	Floriferous erect shrub with deep green foliage	Suits well drained sandy soils in full sun/part shade. Good for pot culture. Esperance plains
Grevillea	flexuosa	Tangled Grevillea	July-Oct	Cream	2	Irregular, few branched shrub.	Red/brown sand with laterite and gravel, sand over granite

Eucalyptus	woodwardii	Lemon Flowered Gum	July-Nov	Yellow	6-10	Small tree with spectacular flowers	East of Kalgoorlie

Understorey Plants

Hills residents know that trying to grow plants under the shade of a big Marri tree can be a challenge. Their hungry roots and the lower level of sunlight doesn't suit all plants. Here is a list of plants (some of which are in our plant sale) that should not mind growing in the shade or part-shade.

Clumping Plants:

Microlaena stipoides
Neurachne alopecuroidea
Orthrosanthus laxus
Sowerbaea laxiflora

Climbers:

Hardenbergia comptoniana
Kennedia coccinea

Ground Covers:

Kennedia prostrata
Labichea punctata
Scaevola caliptera

Shrubs:

<i>Acacia alata</i>	<i>Hakea amplexicaulis</i>
<i>Acacia pulchella</i>	<i>Hakea cyclocarpa</i>
<i>Bossiaea pulchella</i>	<i>Hakea lissocarpa</i>
<i>Chorizema cordatum</i>	<i>Hakea trifurcata</i>
<i>Chorizema dicksonii</i>	<i>Hovea pungens</i>
<i>Chorizema ilicifolium</i>	<i>Hovea trisperma</i>
<i>Darwinia citriodora</i>	<i>Phyllanthus calycinus</i>
<i>Gompholobium knightianum</i>	<i>Trymalium ledifolium</i>

Trees:

Banksia grandis

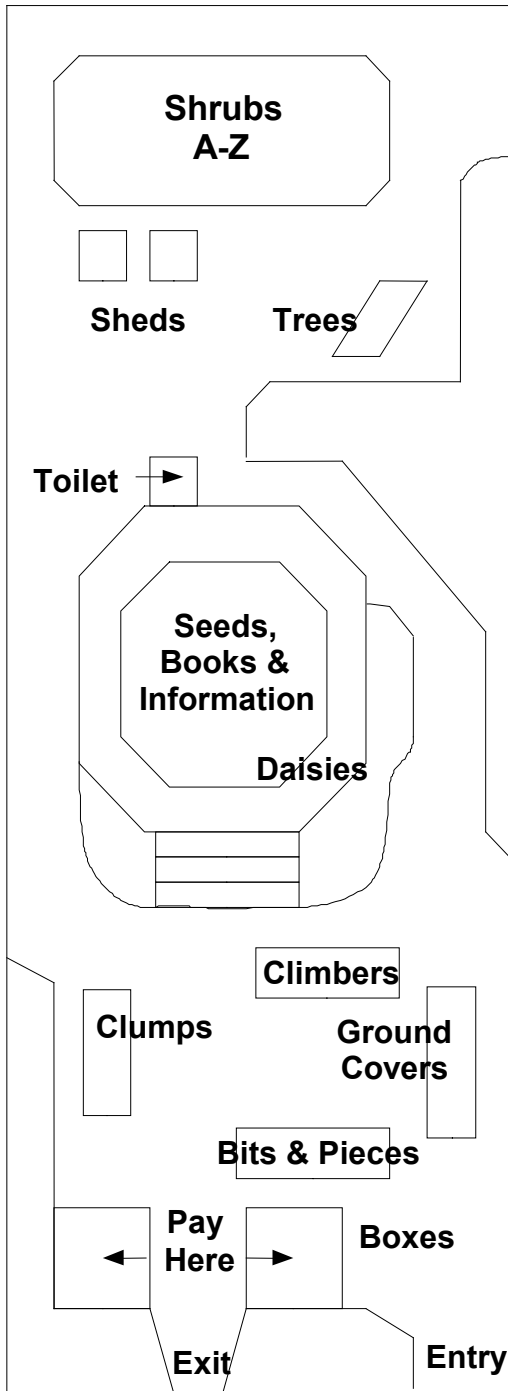

POT RECYCLING

What do you do with the pots from the plants you've bought today after you've got them all into the ground?

Please bring them back! We're especially looking for the long black pots known as tubes, which are best for native plants. We'd love to recycle them back to the growers so they can grow more lovely plants for next year's sale.

Just place them in the yellow wire trolley on the verandah of the Octagonal Hall. The front gate is open anytime.

EHWFS PLANT SALE 2024

Front Garden:

Climbers
 Ground Covers
 Clump Plants (Monocots)
 Bits & Pieces Table

Behind Hall:
